EXPANDED EXECUTIVE CAUCUS APPLAUDS THE NEC

The result-oriented EXPANDED EXECUTIVE CAUCUS after a two and a half hour deliberation yesterday unanimously agreed to throw the full weight of their support behind the NEC in its effort to shift MEDA to the next level.

Most significantly delegates representing all MEDA-USA chapters agreed to aggressively encourage their constituents to converge like they have never done before on DC for the 10th Commencement slated for Washington DC in July of '06. The president received special encomiums for his diplomatic efforts to resolve the venue issue.

The Caucus condemned in unambiguously strong terms misguided attempts by individuals to disrupt the progress of the Association. In the same vein they reminded the NEC that the Houston Mandate was derived from the Association and not from any individual.

Details of this August get-together would be revealed later.

God bless us all.
