

MEDA-USA HIV-AIDS SUPPORT PROJECT FOR MOGHAMO

Preamble:

MEDA-USA is a Moghamo cultural and development association comprising members drawn from all the 22 villages of Moghamo Fondoms living in the USA.

Project:

MEDA-USA has decided to offer assistance to support the fight against HIV/AIDS in Moghamo area.

The assistance will be directed towards the following:

1. Sensitization
2. Support to very needy people currently receiving anti-retrovirals
3. Possible equipment of a medical facility in Moghamo area to give it the ability to test for HIV.

Agenda:

The launching of the anti-HIV/AIDS rally will take place on a Guzang market day before March 31st 2006. During the launching, HIV awareness ribbons will be distributed and other activities will follow the launching.

Operational Strategy:

MEDA-USA envisages a situation where they will start by adopting 5 Moghamoans infected with HIV/AIDS and taking over their treatment plans in exchange for them acting as ambassadors in the HIV sensitization programs like talking at schools, churches and meeting places (This strategy could be modified if the problem of stigma is an obstacle to its implementation). Some sensitization campaigns need to be videotaped so as to report effectively to sponsors.

Coordination:

The project will be coordinated by Njei Moses Timah (Pharmacist/Writer) Tel: 776 19 18
